

2024 Dividing the Waters Conference

The Great Salt Lake: A Case Study of One of the West's Emerging Conflicts Over the Use of Water

May 15 – 19, 2024 | Salt Lake City, UT | Tuition: \$1199 | Conference Fee: \$459

Description The Lake's watershed stretches north to Logan, south to Provo, and east into the mountains of the Wasatch Front. Like other "terminal lakes" in the Great Basin, upstream water diversions for farms and cities have led to the Lake shrinking. Join Dividing the Waters for its next amazing conference on water including the Friday field trip to the Great Salt Lake.

What will I learn?

Participants will learn how to evaluate the scientific, technical and legal issues that arise in litigation over the use of water during a drought. At the conclusion of the conference, the participants will be better prepared to make reasoned and thoughtful decisions about the use of critical water resources.

After attending this course, participants will:

- Understand how the law grapples with problems of water scarcity
- Be able to evaluate and weigh scientific evidence relevant to resolving water disputes
- Be better prepared to make principled decisions about the use of water during scarcity

Distinguished Faculty

The faculty will consist of judges, water lawyers, scientists and water administrators with wide ranging experience in water litigation and management in the western United States.

Register judges.org/dtw2024

Participants will be responsible for their own travel and lodging. Scholarships are available, and you can request a scholarship during online registration.
